**Categories:** 11-19 to 1-10 2014

Kevin,

1 – As I indicated in the voice message I left you, probably don't need call to discuss, but want to clarify we understand your response on two items. As indicated in the voice message I received from you, Rob should reach out and call Bernie directly and to gain clarification. If Bernie cannot clarify, I'll follow up with you after that.

2 – UAO would require us to update the Hydrogeo Study WP within 14 days from receipt of EPA response - which would make revised WP due on 12/23. Given holidays, and the fact that the work couldn't realistically begin before March/April 2014, may we have an extension to submit until Jan 10, 2014 for update? That gives us a little breather if it takes several days for Rob and Bernie to connect.

We may want to set up a call to discuss.

Kevin
